

1. The invention of the telegraph in 1837 sped up communication dramatically. A criminal, John Tawell, was caught after he had escaped on the train to London. A telegram was sent to the London police, and they were waiting for him when he arrived there.

The underline pronoun “ **him** ” refers to -----

- A) John Tawell                      B) London police                      C) the telegraph                      D) the train

2. It was only later that Jane would learn how dangerous they could be. She saw that different groups of chimpanzees had battles in which they tried to wipe out the rival.

The underline phrasal verb ‘**wipe out**’ means -----

- A) to receive sounds, phone signals, etc.  
B) to cause something to happen  
C) to destroy something completely  
D) to see something with difficulty

3. How could a young English woman with no scientific training possibly make contact with a group of wild chimpanzees? At first, the animals ran away as soon as they saw her. But maybe because she knew very little about these wild animals, it is highly likely that her calmness gained their trust. It was only later that Jane would learn how dangerous they could be. She saw that different groups of chimpanzees had battles in which they tried to wipe out the rival group.

**How did the chimpanzees react when Jane first tried to make contact with them?**

- A) They attacked her immediately  
B) They ignored her completely  
C) They ran away as soon as they saw her  
D) They welcomed her calmly

4. A giant panda popularity enables organisations such as the WWF to raise money to support a range of critically endangered species. However, less well-known or ‘exciting’ creatures are far more likely to become extinct because they don’t get enough attention from researchers. Invertebrates (animals without a backbone) make up over 90% of all the creatures on Earth, but get only a tiny percentage of the money available to protect our wildlife.

**One of the following is a part of the body -----**

- A) backbone                      B) Invertebrates                      C) creatures                      D) animals

5. Other creatures become endangered precisely because people find them ugly.

Take the aye aye for example. Found only on the island of Madagascar, it is the world’s largest nocturnal primate. they sleep in nests in the trees, coming out to hunt at night.

They are solitary creatures, furry, and harmless but unfortunately, they are often killed.

**The above paragraph talks about is -----.**

- A) nests                      B) Madagascar                      C) aye aye                      D) ugly

6. The threat faced by the pangolin, however, is far from accidental. Unique among mammals, it is covered in scales, like a reptile. They may not look very cuddly or cute, but these scales are highly prized in traditional Chinese medicine,

- pangolin's scales used in -----

- A) among mammals                      B) highly prized  
C) cuddly or cute                      D) Chinese medicine

7. And what about those creatures that many people would find positively ugly? With its tiny eyes, big mouth and slimy pink body, the blobfish is far from attractive. This marine creature lives deep in the ocean, where the pressure is very high. As a result, it has tiny fins and no skeleton, which keeps it from being crushed by the water pressure. Unfortunately, when fishing boats sweep the ocean floor, looking for other fish and crustaceans, these fish can get swept into the nets accidentally.

- What makes the blobfish appear unattractive to many people?

- A) Its bright colors and sharp teeth  
B) Its tiny eyes, big mouth, and slimy pink body  
C) Its hard skeleton and large fins  
D) Its shiny scales and long tail
